Subject: RE: Hackberry Carbon Sequestration, LLC

Ken: As I may have mentioned in our pre application teams meeting, Lonquist is supporting the Hackberry Carbon Sequestration (HCS) application and due to the sensitive nature of much of the application, HCS desires that much of the application be filed under a Confidential Business Information status. Would it be possible to schedule a Teams meeting later this week to discuss ? HCS would identify the individuals that would access and submit documents and we would provide that information in whatever manner you folks desire.

HCS will be working with the LDNR staff as well to share information once the agency has the appropriate confidential business information protections in place.

Regards,

Maurice Gilbert
Chief Engineer

Subject: [EXTERNAL] Hackberry Carbon Sequestration, LLC

*** EXTERNAL EMAIL - Be cautious of attachments, web links, and requests for information ***

Hi Steve,

This is to confirm our conversation about setting up a CBI folder for submission of the CBI part of the Hackberry Carbon Sequestration, LLC folder. Ken Johnson will set that up, he may need some additional details (such as a list of names) for folks who are to have the rights to submit to it.

As noted in the phone call, these are usually done in conjunction with a GSDT account for the project. For that would appreciate confirmation from the signing authority that LDNR may access the GSDT portion, when things are submitted. (No one sees it before then.)

For your benefit I have attached a set of our Region 6 draft documents designed to get our applicants linked to key information and Regional specific requests such as the Cross-walks. All these are in draft format, if you would like to be provided periodic updates please let me know.

Regards,
Nancy
